DETAILED ACTION - ALLOWANCE

1. Claims 8-22 are allowed. All claims thus being allowable, prosecution on the merits is closed in this application. A statement of the examiner's reasons for allowance is provided in the paragraph which follows below.

Reasons for Allowance

2. The instant application is deemed to be directed to a nonobvious improvement over the invention(s) of Kuniyoshi et al. (1995) and Suematu et al. (1993) disclosed by applicant as being representative example(s) in the art to which the instant invention pertains. In particular, said improvement provides an advanced vision sensor having a both a long focal length and a wide angle of view, as a whole; which simultaneously achieves high definition in the central region of a telephoto image by including a novel aspherical surface arrangement on the most object-side lens surface of a taking lens included therein. The aforesaid surface has positive optical power in a central portion of the lens, and a negative optical power in a peripheral portion thereof (*e.g. a lens of this type is often referred to as either a "fovea lens" and/or a "distortion lens"*) and satisfies the conditional relationship $-90 < Da < -20$ as recited in each of the instant independent claims (Claim 1, Lines 5-9; Claim 120, Lines 8-12). The prior art taken either singly or in combination fails to anticipate or fairly suggest the limitations of applicant's independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The claimed invention is therefore considered to be in condition for allowance as being novel and nonobvious over prior art.

Other Remarks/Information

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ueyama (US2004/0179100A1), Sato (JP2000-341568A, and Suzuki (JP5232208 A)
